BIM-ALERT/VSE

BIM-ALERT/VSE is a comprehensive, menu-driven, batch security product used to control user access to datasets, programs, libraries, sublibraries, JCL keywords, ICCF pseudo partitions, and other resources without changes to JCL.

- Control access to z/VSE datasets including VSAM, non-VSAM, and tape datasets with complete read, update, and delete/define protection
- Control access to all z/VSE libraries at the library, sublibrary, and library member levels with complete execute, read, update, and delete/define protection
- Control the DITTO utility down to the individual command level
- BIM-ALERT/VSE facilities include
 - ✓ A complete monitor mode and test facility
 - ✓ Security for job submittal from BIM-EDIT, CMS, ICCF, and other online systems
 - ✓ Interface with many other vendor products, and other CSI products
 - ✓ Auditing and violation log file reporting and archival utilities
- Advantages of using BIM-ALERT/VSE include
 - ✓ Low overhead, with no penalties for operation
 - ✓ Comprehensive z/VSE resource security
 - ✓ Security system auditability
 - ✓ Ease of use
- BIM-ALERT/VSE is unsurpassed in operating efficiency and ease of use for non-technical auditors, security administrators, and other personnel. To define security, simply fill in the blanks on BIM-ALERT/VSE's interactive screens.
- BIM-ALERT/VSE supports VSE/ESA 2.4 and above, and z/VSE up to release 4.2
